PROJECTS

Responsive Weather Application   2025

- Built a responsive and interactive weather web app using **HTML, CSS, and JavaScript**. Integrated **OpenWeatherMap API** to provide real-time weather data, 3-day and hourly forecasts, air quality and UV index gauges, city search with suggestions, and geolocation support. Includes a dark/light theme toggle and accessible, mobile-friendly UI.

Responsive E-Commerce Website   2023

- Designed and built a responsive e-commerce storefront with **HTML** and **CSS**, implementing mobile-first navigation using **JavaScript**. The project provides a complete user-facing experience, from the main page and product listings to the shopping cart.
